DETAILED ACTION

1. This is an Allowance of all claims pending after entry of the Amendment filed 5/4/2011. Claim 16 is allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the method of creating a semi-standard financial instrument based on extracted root products whereby the root products are identified by the *creating...*, *extracting...*, and *identifying...* steps of the present invention, in the manner specifically recited by claim 16.

Specifically, none of McClendon et al. (US Pat. 6,625,619), Tegethoff (US Pat. 5,539,652), Heaton et al. (US Pat. 7,729,949 and US Appl. Pub. 2010/0042531), Huang et al. (US Pat. 5,953,707), and Shepherd (US Pat. 6,134,536) or (non-patent literature) Kaplan (1999), Ryu (1998), and Noori (2000) teach the particular method of the invention as recited, wherein the step of creating a hierarchical product taxonomy of a group of products of the sector includes a step of *identifying one or more dominant product groups or sub-groups based on the value-added of the group or subgroup being approximately equal to or exceeding 80% of the total dollar value of the product group or subgroup for such product items, wherein the value-added is based on the purchase price of materials for each group or sub-group item, and iterating the creating, extracting, and identifying by further branching the product taxonomy tree for each identified dominant product sub-group, until all root products are identified based on*

applying Pareto's Law to the dollar value-added of identified dominant product groups or sub-groups as recited in claim 16.

The prior art Kaplan, Ryu, Sankaran, Noori, Shepherd, and McClendon teach various methods of breaking down products into product groups and subgroups to create hierarchical taxonomies or "trees" or "fractal manufacturing" breakdowns including arriving at "base unit products" (e.g. Shepherd) for business-to-business or general supply chain commerce, and capturing of market-related data in the taxonomy (e.g. McClendon, column 11, line 28 "Market...cost").

The prior art Heaton et al. teaches standardizing futures contracts based on standardized profiles to arrive at indexed futures contracts for, by example, *diamonds*, whereby in an analogous manner to the present invention, a financial instrument based on a "root product" is indexed to an underlying derivative associated with the product.

Huang et al. and Tegethoff teach the use of Pareto analysis in their analyses of product supply and manufacturing processes (see Huang, Figure 29 and related discussion; Tegethoff, Summary, "[P]areto analysis is provided at three different levels..."). However, neither Huang nor Tegethoff use Pareto analysis in the manner of the present invention: Huang (see Figure 29) uses Pareto analysis of "% Cumulative Sales vs % Number of Products" for supply chain forecasting, and Tegethoff (see Summary) uses Pareto analysis to rank parts and subcomponent parts contribution to test and quality attributes of an electronic assembly. That is, neither Huang nor Tegethoff teaches using Pareto analysis for creating the product taxonomy tree to arrive at the *extracted root products* by iterating the *creating...*, *extracting...*, and *identifying...*

until all root products are identified based on applying Pareto's Law to the dollar value-added of identified dominant product groups or sub-groups. In this manner, the identification of the groups, subgroups, and root products is iterated only to the extent that each group, subgroup, or root product level of the hierarchical taxonomy constitutes a Pareto majority of the value-added of the groups or subgroups, thereby avoiding full exploration of the hierarchy for the purpose of extracting root products on which the semi-standard financial instruments are based.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
